

DigiTel is affordable, easy to use, and will help you get more done in less time!

- Call DigiTel from any phone, enter your ID, and dictate.
- Up to 4 doctors can dictate at the same time.
- Indicate STAT work, record, pause, play back, and much more, using touch-tone control.
- The instant you complete a dictation, it is immediately available to your transcriptionist.
- DigiTel runs in the background on your pc to answer your calls and record your dictations.
- DigiScribe runs on your transcriptionist's pc to play back your dictations for typing.
- Designed by dictation experts who care about your success.

Imagine calling in your dictation from **ANY** phone, at **ANY** hour, from **ANY** location!

DigiTel makes this a reality! It gives you **AUTOMATIC** dictation delivery, **FASTER** document turn-around, and an **EARLIER** end to your work day!

DigiTel — “Medical Dictation Made *Easy*” from Apptec Corporation (*developers of next generation digital dictation systems for over 17 years*) makes your job of dictating medical records **easier**, and your transcriptionist's job of transcribing **faster**.

Now you can **instantly send** your dictations to your transcription staff or medical transcription service.

And now your transcriptionist can **instantly retrieve** your dictations from any pc connected to the web.

DigiTel installs in minutes and is easy to use... we'll even install it for you and teach you how to use it, for free!

With DigiTel

- **Eliminate tape handling and file downloading** now that your **DigiTel** system automatically delivers your dictation.
- **Do more work in less time** now that you can call in your work from any phone, with it instantly available for typing.
- **Get home on time more often** now that you can dictate as easily at home and while traveling, as you can at the office.
- **Increase your entire staff's efficiency** now that everyone on your staff can dictate easily using the **DigiTel** system.

Let us show you how with a live demo right on your pc !
